Target Role: Search for Jobs | **Company:** Soti

Subject: Application for Search for Jobs - KARTIK BHATT

Dear Hiring Team,

I am excited to apply for the Compensation Analyst position at Soti in Gurgaon. With over three years of experience delivering data-driven solutions and process improvements in fast-paced consulting environments, I am eager to bring my analytical expertise to support Soti's compensation strategy and reporting needs.

At KPMG, I led the design and deployment of a Power Platform solution that enabled 20,000 annual outreach activities across 13 sectors, delivering a 1,200-hour annual time saving. I also automated legacy Excel-based data collection for 45 business pillars, built VBA macros for a global asset repository of 30,000+ items, and created a Copilot-powered data cleaning agent-together saving more than 2,000 hours each year. These projects required rigorous data modeling, stakeholder coordination, and measurable impact-core competencies for a Compensation Analyst.

My toolkit includes advanced Excel, Power BI, SQL, Power Automate, Power Apps, and Copilot GenAI, complemented by certifications such as Microsoft Azure AI Fundamentals, AI Transformation Leader, and Lean Six Sigma Yellow Belt. I have applied Lean Six Sigma principles to streamline workflows and improve data accuracy by 25%, experiences that align directly with compensation data validation, reporting, and continuous improvement at Soti.

I am confident that my blend of analytical rigor, automation expertise, and award-winning delivery will add immediate value to Soti's compensation team. I welcome the opportunity to discuss how my background can support your objectives and am available for an interview at your convenience. Thank you for your consideration.

Warm regards,

KARTIK BHATT
