Target Role: Knack Studios Power Automate Developers | **Company:** Smartrecru

Subject: Application for Knack Studios Power Automate Developers - KARTIK BHATT

Dear Hiring Team,

Dear Hiring Team at Smartrecru, I am writing to apply for the Power Automate Developer position with Knack Studios. With over three years of hands-on experience designing end-to-end Power Platform solutions and a proven track record of delivering automation at scale, I am eager to contribute to your innovative projects in Chennai.

At KPMG, I led the creation of a Power Platform suite that enabled 20,000 annual outreach activities across 13 sectors, delivering Power Automate flows, SharePoint lists, Power Apps, and Power BI dashboards that saved more than 1,200 hours each year. By migrating legacy Excel-based data collection for 45 pillars to automated SharePoint integration, I eliminated manual effort and captured an additional 2,000+ hours annually, while VBA-driven asset refreshes for a 30,000-item repository reduced processing time by 485 hours per year.

My expertise extends to SharePoint Online governance, Power BI analytics, and the emerging Copilot Studio ecosystem, where I built a multi-modal Copilot agent that trimmed 325 hours of data preparation work. Certified in Azure AI Fundamentals, AI Transformation Leadership, and Lean Six Sigma Yellow Belt, I combine technical depth with process optimization rigor to drive measurable efficiency gains.

I am confident that my blend of Power Automate mastery, data-centric automation, and continuous improvement mindset will add immediate value to Smartrecru's delivery teams. I welcome the opportunity to discuss how I can support your goals and am available for an interview at your convenience. Thank you for your consideration.

Warm regards,

KARTIK BHATT
