Target Role: Power Automate Developer (Junior/Middle) | **Company:** Pwc

Subject: Application for Power Automate Developer (Junior/Middle) - KARTIK BHATT

Dear Hiring Team,

Dear Hiring Team at PwC, I am writing to apply for the Power Automate Developer (Junior/Middle) position. With over three years of experience delivering end-to-end automation solutions in fast-paced consulting environments, I am eager to contribute to PwC's innovative technology practice.

In my current role as Analyst at KPMG, I built a comprehensive Power Platform solution that enabled 20,000 annual reachouts across 13 sectors, integrating Power Automate flows, SharePoint lists, Power Apps, and Power BI dashboards and saving 1,200 hours per year. I also automated the migration of Excel-based data for 45 pillars via three Power Automate flows, created VBA-macro tools that refreshed a global repository of 30,000 assets, and developed a multi-modal Copilot agent that reduced manual data-tagging effort by 325 hours annually-collectively delivering more than 2,000 hours of efficiency each year while supporting 100+ RFP/RFI requests and managing SharePoint governance for 10,000+ members.

My skill set extends to Power Apps, Power BI, SharePoint Online, SQL, and Microsoft Copilot Studio, enabling me to design scalable, data-driven workflows. I hold certifications such as Microsoft Certified: Azure AI Fundamentals, AI Transformation Leader, AI Business Professional, and Lean Six Sigma Yellow Belt, which reinforce my expertise in automation best practices and process-improvement-a perfect fit for PwC's focus on high-impact, client-centric solutions.

I am excited about the prospect of bringing my proven automation track record and collaborative mindset to PwC. I am available for an interview at your convenience and look forward to discussing how my experience can help deliver robust Power Automate solutions for your clients.

Warm regards,

KARTIK BHATT
