Target Role: Software Engineering & Development - Assistant Manager | **Company:** Statestreet

Subject: Application for Software Engineering & Development - Assistant Manager - KARTIK BHATT

Dear Hiring Team,

I am excited to apply for the Software Engineering & Development - Assistant Manager position at State Street in Bangalore. With over three years of hands-on experience delivering enterprise-scale automation and analytics solutions, I am eager to bring my expertise in Power Platform, data engineering, and AI-enabled workflows to support State Street's digital transformation initiatives.

At KPMG, I led the design and deployment of a comprehensive Power Platform solution that enabled 20,000 annual outreach activities across 13 sectors, delivering Power Automate flows, SharePoint lists, Power Apps, and Power BI dashboards that saved more than 1,200 hours each year. By migrating legacy Excel-based data collection for 45 pillars to an automated SharePoint-integrated system and building VBA-macro utilities for a global asset repository of 30,000+ items, I generated an additional 2,000+ hours of efficiency annually. My work also supported over 100 RFP/RFI responses and a contact-management system for 10,000+ members, earning multiple KPMG awards for Lean Six Sigma-driven impact.

My technical toolkit aligns directly with the role's requirements: advanced Power Automate and Power BI development, SharePoint Online governance, Power Apps, and Copilot GenAI agents for intelligent data handling. I hold Microsoft certifications in Azure AI Fundamentals, AI Business Professional, and AI Transformation Leader, complemented by a Lean Six Sigma Yellow Belt and Oracle Agentic AI certification. These credentials, combined with solid SQL knowledge and a proven record of building scalable, fabric-compatible data pipelines, position me to drive State Street's software engineering initiatives effectively.

I look forward to discussing how my blend of automation expertise, data-centric development, and award-winning delivery can add measurable value to State Street's technology roadmap. I am available for an interview at your convenience and can be reached via email at kb270102@gmail.com or phone at +91-7428062532. Thank you for considering my application.

Warm regards,

KARTIK BHATT
