Target Role: Power BI Consulting & Dashboard Services | **Company:** Preeminentsoft

Subject: Application for Power BI Consulting & Dashboard Services - KARTIK BHATT

Dear Hiring Team,

I am excited to apply for the Power BI Consulting & Dashboard Services role at Preeminentsoft, where my extensive work building Power BI dashboards and end-to-end Power Platform solutions aligns directly with your focus on interactive analytics and AI-driven insights.

At KPMG I delivered a Power Platform solution that combined Power BI, Power Automate, Power Apps and SharePoint to reach 20,000 contacts across 13 sectors, saving 1,200 hrs annually, and I built a multi-modal Copilot agent that automated data cleaning and metadata tagging, delivering 325 hrs of efficiency each year. These projects demonstrate my ability to create scalable, data-rich visualizations and automate complex data pipelines.

My core skill set-Power BI, Power Automate, Power Apps, SharePoint Online, MS Excel, SQL, and Copilot GenAI-matches the technologies highlighted in your job description, enabling seamless integration with Excel, Dynamics 365 and other data sources while delivering AI-enhanced analytics.

Thank you for considering my application. I am available for an interview at your convenience and look forward to discussing how my proven experience can accelerate Preeminentsoft's Power BI consulting initiatives.

Warm regards,

KARTIK BHATT
