Target Role: Power Bi Developer Jobs In Noida - 523 Verified Vacancies | **Company:** Apna

Subject: Application for Power Bi Developer Jobs In Noida - 523 Verified Vacancies - KARTIK BHATT

Dear Hiring Team,

I am applying for the Power BI Developer position in Noida because my experience building Power BI dashboards and end-to-end Power Platform solutions at KPMG directly aligns with the role's focus on data visualization and reporting.

At KPMG I delivered a Power Platform solution that included Power BI dashboards serving 20,000 annual outreach across 13 sectors, saving 1,200 hours each year, and I automated the refresh of a 30,000 asset repository, cutting 485 hours of manual work annually. These outcomes demonstrate my ability to create high-impact analytics that drive efficiency.

My skill set matches the job requirements: expert use of Power BI, Power Apps, Power Automate, and SharePoint Online for data integration; strong SQL knowledge for data modeling; proven stakeholder management across 13 sectors; and fluent English communication at an intermediate/advanced level.

I am eager to bring these proven analytics capabilities to your team and can start immediately. Thank you for considering my application.

Warm regards,

KARTIK BHATT
