Target Role: Power BI Developer | **Company:** Capgemini

Subject: Application for Power BI Developer - KARTIK BHATT

Dear Hiring Team,

I am writing to express my interest in the Power BI Developer position at Capgemini. My experience delivering large-scale Power BI and Power Platform solutions at KPMG, where I automated reporting for 20,000 annual outreach activities, directly aligns with your need for data-driven insight delivery.

At KPMG I built Power BI dashboards that saved 1,200 hours each year and engineered a comprehensive Power Platform workflow that integrated Power Automate, Power Apps, and SharePoint for seamless data migration across 45 business pillars. Additionally, I created a Copilot-powered agent that streamlined data tagging, delivering a further 325-hour efficiency gain.

My technical toolkit includes Power BI, Power Automate, Power Apps, SQL, and SharePoint Online, complemented by hands-on experience with Copilot GenAI and Lean Six Sigma methodologies-skills explicitly mentioned in your job description. This blend enables me to design, develop, and govern robust analytics solutions while driving continuous improvement.

I am eager to bring my proven track record of data automation and stakeholder collaboration to Capgemini's innovative team and am available to discuss how I can contribute to your projects at your earliest convenience.

Warm regards,

KARTIK BHATT
