Target Role: Companies that use Microsoft Power Automate in India (342) | **Company:** Theirstack

Subject: Application for Companies that use Microsoft Power Automate in India (342) - KARTIK BHATT

Dear Hiring Team,

I am applying for the role focused on Microsoft Power Automate at Theirstack because my recent work at KPMG involved building enterprise-wide Power Automate workflows that streamlined outreach to 20,000 contacts and saved over 1,200 hours each year.

At KPMG I delivered a Power Platform solution that automated reachouts across 13 sectors, integrated SharePoint lists, Power Apps, and Power BI, and directly saved 1,200 hrs annually; additionally, I migrated legacy Excel data for 45+ pillars using three Power Automate flows, achieving more than 2,000 hrs of annual time savings.

My technical toolkit aligns closely with your requirements: extensive hands-on experience with Microsoft Power Automate, Power Apps, Power BI, and SharePoint Online, complemented by Copilot GenAI agents and VBA automation for data processing, all supported by certifications in Azure AI and Lean Six Sigma.

I am eager to bring this automation expertise to Theirstack's initiatives, confident that my proven track record will accelerate workflow efficiency, and I am available to discuss how I can contribute immediately.

Warm regards,

KARTIK BHATT
