Target Role: Power Automate RPA Developer Associate Certification ... | **Company:** Learnsoft

Subject: Application for Power Automate RPA Developer Associate Certification ... - KARTIK BHATT

Dear Hiring Team,

I am writing to express my strong interest in the Power Automate RPA Developer Associate opportunity at Learnsoft. With over 3 years of professional experience as an Analyst at KPMG and Associate Analyst at GlobalLogic, I have built extensive end-to-end process automation solutions using Power Automate, SharePoint Online, and Power Apps.

During my tenure at KPMG, I engineered an enterprise Power Platform solution incorporating Power Automate flows, SharePoint lists, and Power Apps that automated 20,000 annual reach outs and saved 1,200 hours annually. Additionally, I developed automated flows for data migration, alerts, and permission governance across 45+ organizational pillars, ultimately receiving a KUDOS award for applying Lean Six Sigma methodologies to eliminate over 2,000 hours of manual work annually.

My hands-on toolkit directly aligns with your focus on automation workflows, custom connectors, and Microsoft 365 integrations. Beyond core Power Automate and SharePoint Online development, I have built multi-modal Copilot agents and automated data extraction pipelines from multi-level documents, ensuring seamless data flow and governance across complex enterprise environments.

I am eager to leverage my background in Power Automate development and workflow optimization to contribute immediately to Learnsoft. Thank you for your time and consideration, and I look forward to discussing how my practical automation experience meets your requirements.

Warm regards,

KARTIK BHATT
