Subject: Application for Power Automate Developer job in Noida, IN-UP, India - KARTIK BHATT

Dear Hiring Team,

I am writing to apply for the Power Automate Developer position at NTT Data in Noida. My recent role at KPMG involved building large-scale Power Platform solutions that automated outreach to 20,000 contacts annually, directly aligning with the automation focus of this role.

At KPMG I delivered a Power Platform solution that combined Power Automate, Power Apps, and Power BI to streamline outreach across 13 sectors, saving 1,200 hours each year, and I led a migration of data for 45 pillars using three Power Automate flows, which eliminated manual Excel processes and reduced effort by over 2,000 hours annually.

My technical toolkit includes Power Automate, Power Apps, Power BI, SharePoint Online, and Copilot GenAI agents-all highlighted in the job description. I also hold Microsoft certifications in AI fundamentals and transformation, and I have hands-on experience with VBA macros and SQL for data manipulation, providing a strong foundation for the low-code development and workflow automation tasks required.

I am confident that my proven automation achievements and deep familiarity with the Microsoft Power Platform make me a strong fit for NTT Data's team. I am available to discuss how I can contribute immediately and can start at your earliest convenience.

Warm regards,

KARTIK BHATT
