Target Role: Power BI SQL Analyst - Myworkdayjobs.com | **Company:** Iqvia

Subject: Application for Power BI SQL Analyst - Myworkdayjobs.com - KARTIK BHATT

Dear Hiring Team,

I am excited to apply for the Power BI SQL Analyst position at IQVIA in Bangalore. At KPMG I led the design and delivery of Power BI dashboards and automated data pipelines that directly support large-scale stakeholder initiatives, aligning perfectly with the analytical focus of this role.

In my recent projects I delivered a Power Platform solution that reached 20,000 contacts annually and saved 1,200 hrs, and I saved over 2,000 hrs each year by integrating Power Automate, Copilot Studio, and VBA macros. These outcomes demonstrate my ability to generate measurable efficiency gains and high-impact visual analytics.

My skill set matches the core requirements: expert use of Power BI for interactive reporting, strong SQL knowledge, extensive experience with Power Automate, Power Apps, and SharePoint Online for data integration, and hands-on work with Copilot GenAI agents to enhance data quality. I have also applied Lean Six Sigma principles to streamline processes, ensuring data reliability for decision-makers.

Thank you for considering my application. I am available for an interview at your convenience and look forward to discussing how my proven data-automation expertise can contribute to IQVIA's analytics initiatives.

Warm regards,

KARTIK BHATT
