**Subject: Application for Best SharePoint Online Course | Live Training & Projects - KARTIK BHATT**

Dear Hiring Team,

I am applying for the SharePoint Online Course Trainer position at Cromacampus because my extensive hands-on experience delivering SharePoint Online solutions and automating workflows directly aligns with the program's focus on practical, project-based learning.

At KPMG I built a Power Platform solution that reached 20,000 contacts and saved 1,200 hrs annually, and I migrated data for over 45 pillars to SharePoint Online lists, saving more than 2,000 hrs each year. These achievements demonstrate my ability to translate complex SharePoint and automation concepts into measurable outcomes-experience I can bring to live classroom projects.

My core toolkit includes SharePoint Online, Power Automate, Power Apps, Power BI, and Copilot GenAI, all of which are highlighted in your curriculum for list/library creation, workflow automation, and webpart development. Additionally, I have authored process documentation and training materials at GlobalLogic, proving my capability to deliver clear instruction and support learner success.

I am eager to contribute my proven SharePoint expertise and instructional experience to Cromacampus, and I am available to start immediately for the upcoming training cohort.

Warm regards,

**KARTIK BHATT**
