**Subject: Application for Power Bi Developer Jobs in Gurugram (1000+ Open Roles) - KARTIK BHATT**

Dear Hiring Team,

I am applying for the Power BI Developer position in Gurugram, drawn by your focus on building scalable analytics solutions; my experience delivering Power BI dashboards that automate reporting for 20,000 annual outreach aligns directly with that need.

At KPMG I built a Power Platform solution that incorporated Power BI dashboards, saving 1,200 hours each year, and I automated the migration of data from Excel to SharePoint for 45+ pillars, delivering robust, governed data pipelines. Additionally, my VBA-driven refresh of a 30,000 asset repository saved 485 hours annually, demonstrating my ability to drive measurable efficiency.

My technical toolkit includes Power BI, Power Apps, Power Automate, SharePoint Online, and SQL-all core to the role-and I have applied Lean Six Sigma principles to streamline processes. I also bring experience with Copilot GenAI agents for data tagging and with advanced Excel automation, providing a strong foundation for complex data visualization and dashboard development.

I am eager to contribute my proven analytics and automation expertise to your team and am available to discuss how I can add value to your projects at your earliest convenience.

Warm regards,

**KARTIK BHATT**
