**Target Role:** Power BI Analyst/ Developer - Myworkdayjobs.com | **Company:** Agilent

**Subject: Application for Power BI Analyst/ Developer - Myworkdayjobs.com - KARTIK BHATT**

Dear Hiring Team,

I am writing to apply for the Power BI Analyst/Developer position at Agilent. My proven ability to design and deliver Power BI dashboards that drive actionable insights aligns directly with your need for interactive analytics on Orders, Revenue, Shipments, Backlog, and P&L.

At KPMG, I built a Power Platform solution that incorporated Power BI visualizations, supporting 20,000 annual outreach activities and saving 1,200 hours each year. By integrating Power Automate and VBA, I delivered an additional >2,000 hour efficiency gain, demonstrating my capacity to create high-impact BI solutions with measurable business value.

My technical toolkit includes Power BI, Power Automate, Power Apps, SQL, and advanced Excel, all of which are core to the analytics stack you described. I have also managed SharePoint Online sites for content governance and leveraged Copilot GenAI agents for data preparation-skills that complement Agilent's data-driven reporting environment.

I am eager to bring my BI expertise and efficiency-focused mindset to Agilent and can start immediately. Thank you for considering my application.

Warm regards,

**KARTIK BHATT**
