Target Role: BestAdvanced Excel Training in Bangalore with Placement | **Company:** Inventateq

Subject: Application for BestAdvanced Excel Training in Bangalore with Placement - KARTIK BHATT

Dear Hiring Team,

I am applying for the BestAdvanced Excel Training program at Inventateq because my professional background centers on building advanced Excel and VBA-based automation solutions that directly mirror the course's focus on Excel mastery and real-world projects.

At KPMG I engineered VBA macro solutions that refreshed over 30,000 asset records, delivering a 485-hour annual time saving, and created a Power Platform workflow that handled 20,000 annual reachouts, cutting 1,200 hrs of manual effort. Combined, these initiatives saved more than 2,000 hrs each year, demonstrating my capacity to drive efficiency through advanced Excel and automation techniques.

My skill set aligns tightly with the program's requirements: expert use of MS Excel, extensive VBA macro development, automation via Power Automate (comparable to Excel VBA automation), data analysis reporting with Power BI, and experience with AI-enabled tools such as Copilot GenAI, which complements the AI tools component of the curriculum.

I am eager to bring my hands-on automation experience to Inventateq's training environment, contribute to peer learning, and leverage the placement support to advance my career in advanced Excel and data analytics. I am available for an interview at your convenience.

Warm regards,

KARTIK BHATT
