Target Role: Power BI Developer - Myworkdayjobs.com | **Company:** Altera

Subject: Application for Power BI Developer - Myworkdayjobs.com - KARTIK BHATT

Dear Hiring Team,

I am writing to apply for the Power BI Developer position at Altera, attracted by the focus on translating business requirements into robust Power BI solutions-a core strength demonstrated throughout my tenure at KPMG.

At KPMG I built a Power Platform solution that delivered Power BI dashboards for 20,000 annual reachouts across 13 sectors, saving 1,200 hrs, and I automated the migration of 45 data pillars to SharePoint with Power Automate flows, further streamlining data ingestion for reporting.

My technical toolkit aligns directly with the role: extensive Power BI development, deep experience with Power Automate and Power Apps for data integration, strong SQL knowledge for source querying, and proven stakeholder collaboration across large, cross-functional programs.

I am eager to bring this blend of analytics, automation, and stakeholder-focused delivery to Altera and am available to discuss how I can contribute to your team immediately.

Warm regards,

KARTIK BHATT
